James,

Good idea and in your message to the teams, it will be important to stress the importance to submit as soon as possible to allow sufficient processing time. This processing time includes frequency acceptance/selection, billing, payment and radio licence issuance.

Find attached the notice and the following application forms to be forwarded to the teams.

Radio technical information request - support races.doc applies to mobile and or portable units only
Radio technical information request - base, mobiles and portables.doc to be used if the system includes a base station
Short term licence invoice form.doc

Please do not hesitate to contact me if you or any of the teams have any questions.

Thank you for your cooperation.

Best regards

Robert
